

American Journal of innovative

Research & Applied Sciences

Authors are requested to submit their papers electronically by using this Guidelines. Authors are requested to submit the manuscript (That contain: Title, Nam of authors with affiliation, abstract with keys words, Introduction, Materials and Methods, Results, Tables, Figure, Discussion, Conclusion, Acknowledgment and References) in electronic form to the address e-mail: [americanajiras@gmail.com](mailto:americanajiras@gmail.com).

Authors who are unable to provide an electronic version or have other circumstances that prevent online submission must contact the Editor prior to submission to discuss alternative options; email: [americanajiras@gmail.com](mailto:americanajiras@gmail.com).

The Publisher and Editor regret that they are not able to consider submissions that do not follow these procedures. To make sure that you can receive messages from us, please add the 'american-jiras.com' domain to your e-mail 'safe list'. If you do not receive e-mail in your 'inbox', check your 'bulk mail' or 'junk mail' folders.

Please refer to our downloadable sample files to make sure that your submission meets our formatting requirements by using: Template Article Form (WORD 2010) (Download this template from the web site, see authors section).

## SUBMISSION PREPARATION

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines.

1. The manuscript has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).

2. The manuscripts file should be written with MS<sup>TM</sup> Word-2003 or higher versions or with, RTF, WordPerfect document file format or Open Office. Articles prepared in LaTeX may be submitted in PDF format for use during the review process. After acceptance, however, text files will be required.

3. Where available, URLs for the references must be provided.

4. The text is single-spaced; uses a 10-point font; employs italics, rather than underlining; and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.

5. The text adheres to the stylistic and bibliographic requirements outlined in the Author Guidelines.

## GUIDELINES INSTRUCTIONS FOR AUTHORS

Manuscript preparation includes information on fonts, spacing, word, figure and table, manuscript Title Page, Major Headings, Sub-heading, Secondary Sub-heading, Abstract, Introduction, Materials and Methods, Statistical Methods, Results, Figure Illustrations, Photographs, Table, Units of Measure, Equations, Nomenclature, Abbreviations, Discussion, Conclusion, Acknowledgments, References, Authorship Criteria and Conflicts of Interest.

## PLEASE READ CAREFULLY

We accept a manuscript on the understanding that it is reporting unpublished work and that it is not under consideration for publication elsewhere. During evaluation the AJIRAS teams use a plagiarism analysis.

## WORD

The manuscripts should be written with MS<sup>TM</sup> Word or with, RTF, WordPerfect document file format, Open Office, with character size of 10 Tahoma. Articles prepared on Mac systems should be saved in Word for Windows compatible format. Articles prepared in LaTeX may be submitted in PDF format for use during the review process. After acceptance, however, .text files will be required. Please DON'T insert page numbers and DON'T write anything in the Headers and Footers part of the pages.

## INFORMATION ON FONTS

Manuscripts should be written in English or French and typed on single-sided A4 paper. Research articles should include the following, each beginning on a fresh page: title, abstract, introduction, methods, results, tables and figures, acknowledgements, discussion, references.

## SPACING

The text must be **single spaced** with **margins left** and **right** of at least **1cm**.

## TITEL OF MANUSCRIPT

Title of the Paper: It is written in capital letters (Tahoma 12 pt., bold-face) centered on one or more lines. For articles in French, the English translation of the title should be made.

The first page of manuscript should contain an informative title, the first name, and last name of each author. The page should also include the name of University/institution (s), department, city and country to which the work should be attributed, and the

name, address, and email of the author responsible for correspondence about the manuscript.

Names of the Authors: Leaving two blank lines after the Title of the paper, the names of the authors are written (Tahoma 12 pt., bold-face) centered on a line, separated by commas.

Affiliations: are written (Tahoma 8 pt., bold-face) It is written following a blank line after the Names of the Authors and centered on a line. For authors having different affiliations, superscripted Arabic number (i.e. Michael Maroua<sup>1, 2, 3</sup>) are given to the names of the authors and different affiliations are written separately.

## MAJOR HEADING

Major headings such as **ABSTRACT**, **INTRODUCTION**, **MATERIEL AND METHODS**, **DISCUSSION**, and **REFERENCES** should be written in capitals (Color Sky Blue, Tahoma 12 pt., and bold-face) and numbered.

**Sub-heading:** A sub-heading within a section should be typed with first letter of words in capitals (Color Sky blue, Tahoma10 pt., bold-face) and numbered and followed by ".". Then, the text continues (Tahoma 10 pt., Bold Face).

**Secondary Sub-heading:** Beginning letters of sub-heading should be typed with capital letters (Color Sky blue, Tahoma10 pt., and bold-face) and followed by ".". Then, the text continues (Tahoma10 pt., Bold Face).

## ABSTRACT (Color Sky Blue, Tahoma 10 pt., and Bold Face)

Type the word "**ABSTRACT**" as the major heading (without any section number). The abstract must not exceed 350 words and must be structured as follows: **Background**, **Objectives**, **Methods**, **Results**, and **Conclusions** (Tahoma 9 pt.). The text is given following the affiliation and leaving three blank lines. If the manuscripts write in French the English translation of abstract will be made.

**Keywords:** Type the word "**Keywords**" in italic characters. Keywords related with the study must be given in minimum number (maximum six words) and separated by commas (Tahoma 8 pt.). Also the keys word cited must be different from that in the Title of paper.

## 1. INTRODUCTION (Color Sky Blue, Tahoma 12 pt., and bold Face)

**How to write you introduction:** Introduction is the most delicate part of the writing of article. Thus it is important to keep it short. Removing everything that is not really necessary is often a very effective strategy for improving an introduction. To make success of your introduction you should respect these three parts: **Background**. In this part you have to make clear what the context is. Ideally, you should give an idea of the state-of-the art of the field the report is about. But keep it short. **State the Problem**. If there was no problem, there would be no reason for writing a report, and definitely no reason for reading it. So, please tell the reviewer why she should precede reading. A simple sentence like "So far no-one has investigated the link..." or "The above-mentioned solutions don't apply to the case ...", can sometimes be enough to clarify the point you want to get at. Experience shows that for this part a few lines are often sufficient.

**The Proposed Solution.** Now - and only now! - You may outline the contribution of the report. Here you have to make sure you point out what are the novel aspects of your work. There are probably zillions of articles out there on that very subject: you can't expect the reviewer to know them all; so make his life easier and clearly highlight what is the difference between your method

and the others. You can take your time here, but I suggest avoiding getting into too much detail.

## 2. MATERIALS AND METHODS (Color Sky Blue, Tahoma 12 pt., Bold Face)

We encourage the authors to report their research methods in full. If your methods are unusual, please report both successes and difficulties so that other researchers can learn from your experience.

**2.1. Statistical Methods:** (Color Sky Blue, Tahoma 10 pt., Bold Face) Describe the technical statistics used in data analysis.

## 3. RESULTS (Color Sky Blue, Tahoma 12 pt., Bold Face)

You can give the results of your work under the title of "**RESULTS**". Insert the Figure and Table into their place on article. Results should be presented in a logical sequence in the text, tables and figures. Repetitive presentation of the same data in tables and figures should be avoided.

**3.1. Table, Figure, Photographs:** All Table, figures, drawings, graphs and photos should be placed in numerical order in the text and have enough resolution (min. 300 dpi) to be easily followed by the reader. Color photos and drawings are also acceptable.

**3.3. Units of Measure:** All scientific measurements should be expressed in SI units.

**3.4. Equations:** All equations are centered on a line with preceding and succeeding blank lines to separate them from the text and numbered. The equation numbers appear at the right-hand-side of each equation (near right margin) written in parentheses "( )", e.g.

$$D = R \ln(-G/nrt) \quad (1)$$

**3.5. Nomenclature and Units:** use international nomenclature. SI units (meter, kilogram, etc.), as outlined in the latest edition of Units, symbols and Abbreviations: A Guide for Medical and Scientific Editors and Authors (Royal Society of Medicine Press, London), should be used wherever possible.

**3.6. Abbreviations:** For the purpose of simplicity, write the full term for each abbreviation at its first use in abstract, and text. Define the abbreviation inside of parentheses.

## 4. DISCUSSION (Color Sky Blue, Tahoma 12 pt., Bold Face)

The results should be discussed in relation to any hypotheses advanced in the Introduction. Comment on results and indicate possible sources of error. Place the study in the context of other work reported in the literature. If possible discuss also the limitation of the study.

## 5. CONCLUSION (Color Sky Blue, Tahoma 12 pt, Bold Face)

The main conclusions of you study should be presented. Authors will describe the contribution of the work to the scientific community or/and the practical applications of their research or its economic implications. Also, all authors are encouraged to ask:

is there anything the community should be doing differently as a result of your research? Have you identified areas for future research? If so, please state them here.

**Acknowledgment** (Color Sky Blue, Tahoma 12 pt., Bold Face, without number)

This should be after conclusion and not be more than 80 words. Type the word "**Acknowledgment**" as a sub-heading (Without

any number; Color Sky blue, Tahoma 10 pt., bold-face)) followed by the text. Please acknowledge your research funding body and/or colleagues or other organizations that have contributed to the research. Any grant or corporate sponsorship should be noted here.

## 6. REFERENCES

Type the word "**REFERENCES**" as the major heading. References should be numbered in the order in which they appear in the text and in accordance with the examples given at the end of this instruction (Tahoma 8 pt.). The reference numbers in the text should be given in brackets colored in Sky Blue as "[ ]". At the end of the article list in numerical order all reference as they appears in the text (Use Vancouver style). To site references on the text use **color Blue Sky** and respect this form: when two references follow each use coma as: [3,4]. When references are different and not follow each so use dash to separate references that not succeed, for example: [3-9] or [3-9,10,11].

When you begin the sentences by a single authors name so us: Name of author (year of publication) and adds your sentences or paragraph. When there are some authors, so give the Name of the first authors as: Name et al. (Year) and add your sentences or paragraph. For expl: Bofan (2015) suggested that the... or Hofman et al. (2015) demonstrated that the...

The references must be in the following form: author (s), title of journal article. *full name of journal in Italic*. year of publication; Volume number(Issues number): and page numbers in full. Where available, **URLs** for the references **must be provided**. When there are six or fewer authors, list all of them. If there are seven or more, then list the first three followed by et al. (Conference proceedings)

## 7. AUTHORSHIP CRITERIA

Authorship credit should be based only on substantial contributions to each of the two components mentioned below:

- Concept and design of study or acquisition of data or analysis and interpretation of data;
- Drafting the article or revising it critically for important intellectual content;

The identity of authors not revealed in paper except title page. Participation solely in the acquisition of funding or the collection of data does not justify authorship. General supervision of the research group is not sufficient for authorship. Each contributor should have participated sufficiently in the work to take public responsibility for appropriate portions of the content of the manuscript. The order of naming the contributors should be based on the relative contribution of the contributor towards the study and writing the manuscript. Once submitted the order cannot be changed without written consent of all the contributors.

## 8. CONFLICTS OF INTEREST

The author must disclose any and all conflicts of interest they may have with publication of the manuscript or an institution or products used in the manuscripts.

## 9. PRIVACY STATEMENT

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.

## 10. GALLERY PROOFS

Once the final review is completed, the author will be required to resubmit the revised manuscript. The final Galley Proof will be sent via e-mail as an Acrobat PDF file and should be returned within 3 days of receipt.

Alterations to the text and figures (other than the essential correction of errors) are unacceptable at proof stage and authors may be charged for excessive alterations.
